

# Leonardo's Workshop

## Invention Challenge

You're a young inventor living in 15th Century Florence. You've heard about the workshop where Leonardo is an apprentice and you'd like to become an apprentice there too.

Before the workshop owner, Verrocchio, agrees to take you on, he wants to see how good an inventor you are. He asks you to make a clever invention using some of the things that are lying around near the workshop.

## Instructions

1. Create an invention using some or all of the objects on the left. You could trace the objects, copy them or cut them out and stick them to a new piece of paper.
2. Don't forget to colour in the invention.
3. Write two short sentences to explain what your invention does.
4. Send your design to [cbbc.online@bbc.co.uk](mailto:cbbc.online@bbc.co.uk)

See if Verrocchio picks your design for his workshop gallery on the CBBC website.
